- Blockchain Basics

Skills

- Programming in C++
- Video Editing
- Leadership & Team Management
- MS Office (Word, PowerPoint, Excel)
- Strong Communication Skills

Research & Projects

- Blockchain & Smart Contracts
  Conducting ongoing research into blockchain applications and development of small-scale smart contracts,

  focusing on real-world use cases in finance and supply chain management.

- Blockchain-Based Charity Transparency System
  A secure and transparent platform built on the blockchain to ensure full accountability in charitable donations. The system allows donors to track their contributions in real-time, provides an admin dashboard to manage funds efficiently, and guarantees that every transaction is immutable and verifiable. Designed with a user-friendly interface, this project bridges technology and social impact, promoting trust and transparency in charitable giving.
